Responding to ever escalating requirements for performance flexibility and economy the networking industry has opted to build products around network processors To help meet the formidable challenges of this emerging field the editors of this volume created the first Workshop on Network Processors a forum for scientists and engineers to discuss latest research in the architecture design programming and use of these devices This series of volumes contains not About the Author Mark A Franklin received his B A B S E E and M S E E from Columbia University and his Ph D in EE from Carnegie Mellon University He is currently at Washington University in St Louis where he has a joint appointment in Elect
