By Henry Hexmoor : Computational Network Science: An Algorithmic Approach (Computer Science Reviews and Trends) computational network science an algorithmic approach computer science reviews and trends a book by henry hexmoor purchase computational network science computer science reviews and trends the groundwork for a computational algorithm based approach to network Computational Network Science: An Algorithmic Approach (Computer Science Reviews and Trends):

The emerging field of network science represents a new style of research that can unify such traditionally diverse fields as sociology economics physics biology and computer science It is a powerful tool in analyzing both natural and man made systems using the relationships between players within these networks and between the networks themselves to gain insight into the nature of each field Until now studies in network science have been focused on particular About the Author Henry Hexmoor received an M S from Georgia Tech and a Ph D in Computer Science from the State University of New York Buffalo in 1996 He is a long time IEEE senior member and has taught at the University of North Carolina and the University

computational network science 1st edition
