**By Husheng Li : Communications for Control in Cyber Physical Systems: Theory, Design and Applications in Smart Grids** communications and controls in cyber physical systems theory design and applications in smart grids provides readers with all they need to know about cyber physical communications and controls in cyber physical systems theory design and applications in smart grids provides readers with all they need to know about cyber physical Communications for Control in Cyber Physical Systems: Theory, Design and Applications in Smart Grids:

Communications and Controls in Cyber Physical Systems Theory Design and Applications in Smart Grids provides readers with all they need to know about cyber physical systems CPSs such as smart grids which have attracted intensive studies in recent years Communications and controls are of key importance for maintaining and stabilizing the operation of the physical dynamics in these complicated systems This book presents a systematic treatment on t About the Author Husheng Li is an Associate Professor in the Department of Electrical Engineering Computer Science at University of Tennessee Knoxville He received his Ph D degree in electrical engineering from Princeton University Before joining Universi
