File type: PDF | 600 pages | File size: 39.Mb

**By Douglas E. Comer : Network Systems Design Using Network Processors: Intel 2XXX Version** network systems design using network processors has 16 ratings and 2 reviews assuming no knowledge of industry jargon this book describes the design of network systems design using network processors using network processors intel 2xxx version eduintel contains all the program examples from Network Systems Design Using Network Processors: Intel

2XXX Version:

2 of 2 review helpful Prof Comer demystifies NPs for the technical masses By cs211 Prof Douglas Comer of Purdue is one of the best textbook authors in the field of Internet technology and those who have heard him speak as I have know that he is even better in person His TCP IP volumes are classics that almost every engineer in the industry has read The fact that he chose to write a textbook on network processors Assuming no knowledge of industry jargon this book describes the design of network systems such as routers bridges switches firewalls and other equipment used in the Internet It considers the functionality required for protocol processing and explains how the functionality has been implemented on a range of hardware architectures The author focuses on network processor technology a recent development that has become one of the standard tools used by desi
