eText -- Access Card -- for Go! All in One: Computer Concepts and Applications:

0 of 0 review helpful Not happy with purchase By patriciacolbert I ordered this product and it didn't work for the class that it said it would work for I basically threw money away and I had to spend an extra 120 on the real access code The code I bought from is useless to me I would recommend that buyers pay close attention to the products that they buy before purchasing them from ALERT nbsp Before you purchase check with your instructor or review your course syllabus to ensure that you nbsp select the correct ISBN Several versions of Pearson's MyLab Mastering products exist for each title including customized versions for individual schools and registrations are not transferable In addition nbsp you may need a CourseID provided by your instructor
