

Multiwavelength Optical Networks provides complete coverage of the next level of communication networks multiwavelength optical networks which meet the bandwidth demands of today s expanding networks Renowned wireless veteran Thomas E Stern teams with industry innovator Krishna Bala to deliver a comprehensive framework for understanding the technology encompassing the concepts methodology and features of lightwave networks such as physical layout functionality an From the Inside Flap At the present time the telecommunications industry is undergoing unprecedented change brought on largely by the shift from a voice centric to a data centric world a consequence of the rapid growth of the Internet together with other da
