From Brian J Taylor : Methods and Procedures for the Verification and Validation of Artificial Neural Networks on jan 1 2006 brian j taylor published methods and procedures for the verification and validation of artificial neural networks methods and procedures for the verification and validation of artificial neural networks brian j taylor on amazon free shipping on qualifying offers neural Methods and Procedures for the Verification and Validation of Artificial Neural Networks:

Neural networks are members of a class of software that have the potential to enable intelligent computational systems capable of simulating characteristics of biological thinking and learning Currently no standards exist to verify and validate neural network based systems NASA Independent Verification and Validation Facility has contracted the Institute for Scientific Research Inc to perform research on this topic and develop a comprehensive guide to performing V From the Back Cover Artificial neural networks are a form of artificial intelligence that have the capability of learning growing and adapting with dynamic environments nbsp With the ability to learn and adapt artificial neural networks introduce new poten
