By Anna Hac : Wireless Sensor Network Designs wireless sensor network designs anna ha c university of hawaii at manoa honolulu usa a landslide detection system makes use of a wireless sensor network to detect the slight movements of soil and changes in various cross layer design Wireless Sensor Network Designs:

Tremendous technological advances have been made in the development of low cost sensor devices equipped with

wireless network interfaces The area of wireless sensor networks is rapidly growing as new technologies emerge and new applications are developed This book introduces networked embedded systems smart sensors and wireless sensor networks with a strong focus on architecture applications networks and distributed systems support for wireless sensor ne
