all optical computers eliminate the need for optical electrical optical computer architectures the application of optical concepts to next generation computers optical computer architectures the application of optical concepts to next generation computers alastair d mcaulay on Optical Computer Architectures: The Application of Optical Concepts to Next Generation Computers:

Optics is entering all phases of computer technology By providing new research and ideas it brings the reader up to date on how and why optics is likely to be used in next generation computers and at the same time explains the unique advantage optics enjoys over conventional electronics and why this trend will continue Covered are basic optical concepts such as mathematical derivations optical devices for optical computing optical associative memories optical inter
