0 of 0 review helpful Five Stars By Vincent Stanford Excellent book by the authors of the Matlab neural net package Insightful 1 of 1 review helpful Amazing By Neelabh Pant Very good book It talk about a topic and straight jumps to an example which helps the reader to understand the topic very well Highly recommended 1 of 1 review helpful The well known respected authors who developed the Neural Networks toolbox and the Fuzzy Systems Toolbox now bring you this text designed for electrical and computer engineering or computer science beginners The book covers neuron

model and network architectures signal and weight vector spaces linear transformations for neural networks and performance surfaces and optimum points About the Author Ph D Stanford Univeristy
