By Michael Luby : Pseudorandomness and Cryptographic Applications (Princeton Computer Science Notes)

abebooks pseudorandomness and cryptographic applications princeton computer science notes 9780691025469 by michael luby and a pseudorandomness and cryptographic applications princeton computer science notes michael luby on amazon free shipping on qualifying offers a pseudorandom Pseudorandomness and Cryptographic Applications (Princeton Computer Science Notes):

A pseudorandom generator is an easy to compute function that stretches a short random string into a much longer string that looks just like a random string to any efficient adversary One immediate application of a pseudorandom generator is the construction of a private key cryptosystem that is secure against chosen plaintext attack There do not seem to be natural examples of functions that are pseudorandom generators On the other hand there do seem to
