2 of 2 review helpful A good book dealing with stochastic neural networks By Karthik Sundaram This book has dealt with in depth the various entropy error measures that can be used for the neural networks The Minimum entropy error measures and the Maximum entropy error functions like the Kapur measures Sharma Mittal error measures are discussed as an alternative to the classical square error methods when the input and Information theoretics vis a vis neural networks generally embodies parametric entities and conceptual bases pertinent to memory considerations and information storage information theoretic based cost functions and neurocybernetics and self organization Existing studies only sparsely cover the entropy and or cybernetic aspects of neural information Information Theoretic Aspects of Neural Networks cohesively explores this burgeoning discipline covering topics such
