are very few comprehensive and current books about the broad range of Big Data Analytics which are suitable for use as university textbooks for the subject. Bahga and Madisetti's book is an exception introducing the characteristics of Big Data projects surveying modern analytic concepts. We are living in the dawn of what has been termed as the Fourth Industrial Revolution which is marked through the emergence of cyber-physical systems where software interfaces seamlessly connect over networks with physical systems such as sensors, smartphones, vehicles, power grids, or buildings to create a new world of Internet of Things (IoT). Data and information are fuel of this new age where powerful analytics algorithms burn this fuel to generate decisions that are effective. About the Author: Arshdeep Bahga is a Research Scientist with Georgia Institute of Technology. His research interests include cloud computing and big data analytics. Arshdeep has authored several scientific publications in peer-reviewed journals in the areas of cloud computing, big data, and IoT.
