Kenneth C Deshpande Jayant G Thottan Marina Communication Networks for Smart Grids Making Smart Grid Real
Springer 2014 ISBN 978 1 4471 This book presents an application centric approach to the development of smart grid
communication architecture The coverage includes in depth reviews of such cutting edge applications as advanced
metering infrastructure distribution automation demand response and synchrophasors Features examines a range of
exciting utility applications made possible through smart grid evolution describes the core edge network architecture
for smart grids introducing the concept of From the Back Cover A 21st century clean energy economy demands a 21st
century electricity grid yet the communication networks of many utilities today are ill equipped for smart grid
evolution This must read text reference presents an application centric appr
