computer science series editors modeling trust context in networks 123 stan zdonik peng ning shashi shekhar jonathan katz xindong wu news download as pdf modeling trust context in networks springerbriefs in computer science modeling and applications 31 modeling trust context in Modeling Trust Context in Networks (SpringerBriefs in Computer Science):

We make complex decisions every day requiring trust in many different entities for different reasons These decisions are not made by combining many isolated trust evaluations Many interlocking factors play a role each dynamically impacting the others nbsp In this brief trust context is defined as the system level description of how the trust evaluation process unfolds Networks today are part of almost all human activity supporting and shaping it Appl From the reviews lquo The author achieves a brilliant equilibrium of various terms in a relatively small volume making it very easy to read Readers can easily understand various trust issues and the modeling of trust context elements hellip I found thi
