Network science is a rapidly emerging field of study that encompasses mathematics computer science physics and engineering A key issue in the study of complex networks is to understand the collective behavior of the various elements of these networks Although the results from graph theory have proven to be powerful in investigating the structures of complex networks few books focus on the algorithmic aspects of complex network analysis Filling this need About the Author Kayhan Erciyes is a professor of computer science and engineering and also the rector of Izmir University Izmir Turkey Dr Erciyes worked as a research and development engineer of Alcatel Turkey Alcatel Portugal and Alcate
