By Rajkumar Kannan : Managing and Processing Big Data in Cloud Computing big data has presented a number of opportunities across industries with these opportunities come a number of challenges associated with handling analyzing and first from the view of cloud data management and big data processing mechanisms directions in the future on big data processing in cloud computing environments Managing and Processing Big Data in Cloud Computing:

Big data has presented a number of opportunities across industries. With these opportunities come a number of challenges associated with handling, analyzing, and storing large data sets. One solution to this challenge is cloud computing, which supports a massive storage and computation facility in order to accommodate big data processing. *Managing and Processing Big Data in Cloud Computing* explores the challenges of supporting big data processing and cloud. This is a very research-heavy volume, dense with original research analyses and a lot of additional reading references. Although the topics are sometimes fairly narrow, some chapters contain pages and pages of references for additional reading and research.
