Innovations in cloud and service oriented architectures continue to attract attention by offering interesting opportunities for research in scientific communities. Although advancements such as computational power, storage, networking, and infrastructure have aided in making major progress in the implementation and realization of cloud based systems, there are still significant concerns that need to be taken into account. Principles, Methodologies, and Service Oriented Approaches for Cloud Computing. About the Author: Xiaoyu Yang is a Senior Member of Wolfson College, University of Cambridge, UK, and a Research Fellow in the e-Science Center, University of Reading, UK. He completed his post-doctoral research in the University of Cambridge in 2008.
