**By Ruben Rios, Javier Lopez, Jorge Cuellar : Location Privacy in Wireless Sensor Networks (Series in Security, Privacy and Trust)** series in security privacy and trust about this book search simple search advanced

search all books this location privacy in wireless sensor networks wireless sensor networks come with some very challenging demands for security they often call for protection against active attackers trying to disrupt a network Location Privacy in Wireless Sensor Networks (Series in Security, Privacy and Trust):

Today all kinds of ubiquitous systems led by wireless sensor networks can be seen as an unprecedented privacy risk given their ability to collect information on quantities and situations so far unsuspected There is therefore an urgent need to develop mechanisms to ensure privacy in sensor networks Location Privacy in Wireless Sensor Networks focuses on location privacy by which an attacker might determine the source and destination of commu About the Author Ruben Rios is a post doc researcher at the NICS Lab which is part of the Computer Science Department at the University of Malaga in Spain He holds a Cum Laude Ph D in Computer Science from the same university where he also obtained
