| #4504365 in Books | 2018-04-16 | Original language: English | 8.27 x .87 x 5.911, | File type: PDF | 300 pages | File size: 54.Mb

**By Dino Farinacci, Victor Moreno : The LISP Network: Evolution to the Next-Generation of Data Networks (Networking Technology)** home gt; store gt; cisco network technology gt; routing evolution to the next generation of data networks of networking 2 lisp the lisp network evolution to the next generation of data networks networking technology dino farinacci victor moreno on amazon free shipping on The LISP Network: Evolution to the Next-Generation of Data Networks (Networking Technology):

In an era of ubiquitous clouds virtualization mobility and the Internet of Things information and resources must be accessible anytime from anywhere Connectivity to devices and workloads must be seamless even when people move location must be fully independent of device identity The LISP protocol makes all this possible LISP is address family

agnostic so it can encapsulate any protocol within another and route
