Broadband to Your Community:

0 of 0 review helpful Pitfalls to avoid By Glenn A Carleton Great book on a rare subject developing a business case for broadband for rural communities Covers pitfalls and developing a poor business case to include rationale that does not get to the heart of long term value for rural communities or pursuing values that are not financially viable e.g focus on subscriptions to the consumer market In addition exc Separate fact from hype to effectively plan and deliver highspeed Internet services to your community Internationally recognized business strategist Craig Settles gives you a foundation for building a financially sustainable broadband network This book defines the needs identifies the pitfalls lays out the options and ultimately prepares you to structure your own plan to promote better broadband in your community according to Ken Fellman President National Ass About the Author For over 20 years Craig Settles workshops consulting services and books have helped government and other organizations worldwide use technology to cut costs improve business operations and increase revenue Author of Fighting the Good Fight f
