The Brief Description of the YunFS The YunFS is a cloud storage based Distributed filesystem which has some important features Bases on a Distributed Framework that can provide complete dynamic and modular design it is easy to install remove start stop a module with the CLI interface This Framework provides an automatic code generator With an IDL file all necessary files are automatically generated in a second it is From the Author When talking about the design and implementation of a system most technical books are almost hard and boring A reader need nbsp

concentrate nbsp his energies on reading those hard technical books without any distraction Though the reader may ge
