By Vutha Va, Takayuki Shimizu, Gaurav Bansal : Millimeter Wave Vehicular Communications: A Survey (Foundations and Trends(r) in Networking) millimeter wave vehicular communications a survey foundations and trends in networking vutha va takayuki shimizu gaurav millimeter wave vehicular communications a survey in

foundations and trends in networking vol 10 the large spectral channels at millimeter wave Millimeter Wave Vehicular Communications: A Survey (Foundations and Trends(r) in Networking):

The automotive industry is at an inflection point between old and new technologies More sensors are being incorporated into vehicles in an effort to realize safer and more efficient traffic The increase in sensors and sensor complexity has a number of implications on the next generation of vehicles These sensors will generate a huge amount of data that needs to be processed This sensor data places additional computational requirements on the vehicle and requires high

millimeter wave vehicular communications a survey
