By Srinivas Shakkottai, R. Srikant : Network Optimization and Control (Foundations and Trends(r) in Networking)

within a communication network architecture can be r network optimization and control in foundations foundations and trends in networking t2 network optimization and control foundations and trends in networking network optimization and control the internet is a very large network Network Optimization and Control (Foundations and Trends(r) in Networking):

The Internet is a very large network with a complex array of control algorithms designed to facilitate data transfer by the users who use it everyday Network Optimization and Control is aimed at understanding how such control algorithms can be designed for both wired and wireless networks The approach is primarily based on optimization and control theory and studies the problem in terms of designing controllers that would make optimal use of network resources These c
