the book is primarily based on using hadoop 0 20 and or cloudera SummaryHadoop in Practice collects 85 Hadoop examples and presents them in a problem solution format Each technique addresses a specific task you ll face like querying big data using Pig or writing a log file loader You ll explore each problem step by step learning both how to build and deploy that specific solution along with the thinking that went into its design As you work through the tasks you ll find yourself growing more comforta About the Author Alex Holmes is a senior software engineer with extensive expertise in solving big data problems using Hadoop He has presented at JavaOne and Jazoon and is a technical lead at VeriSign
