**By Claus Kühnel : Arduino for the Cloud: Arduino Yún and Dragino Yún Shield** yun shield is an arduino shield which will simply quote;turnquot; arduino leonardo uno lt;brgt;arduino for the cloud lt;brgt;arduino yanduacute;n and dragino yanduacute; getting started with the arduino and genuino yn shield on this page connect the arduino yn shield

to your computer with an usb cable and upload the Arduino for the Cloud: Arduino Yún and Dragino Yún Shield:

Arduino for the Cloud considers the Arduino Yún and the Dragino Yún Shield as components closing the gap between a typical microcontroller application and connection to the cloud Arduino Yún combines the classic Arduino with an Atheros AR9331 system on a chip SoC for wireless access points and routers platforms which uses the Linux distribution Linino OpenWRT operating system The Dragino Yun Shield expands any Arduino with network capabilities About the Author Dr Claus K uuml hnel graduated from the Technical University of Dresden D in the field of information electronics It followed by an education in biomedical engineering nbsp He is responsible for the development of embedded systems for
