By Ahmed F Zobaa, Alfredo Vaccaro : Computational Intelligence Applications in Smart Grids: Enabling Methodologies for Proactive and Self-Organizing Power Systems computational intelligence applications in smart

grids enabling methodologies for proactive and self organizing power systems download and read computational intelligence applications in smart grids enabling methodologies for proactive and self organizing power systems Computational Intelligence Applications in Smart Grids: Enabling Methodologies for Proactive and Self-Organizing Power Systems:

This book considers the emerging technologies and methodologies of the application of computational intelligence to smart grids From a conceptual point of view the smart grid is the convergence of information and operational technologies applied to the electric grid allowing sustainable options to customers and improved levels of security Smart grid technologies include advanced sensing systems two way high speed communications monitoring and enterprise analysis This book provides an in depth survey of the technology of SG control methodologies Since it examines many of the current key issues associated with the deployment of large scale SG engineers computer scientists and educators working in SG technologies
