**From Springer : Trusted Cloud Computing** microsoft has most compliance coverage of any cloud provider confidence in the trusted cloud join startups what is cloud computing the trusted cloud project at microsoft research aims to provide customers of cloud computing complete control over their data no one should be able to access the Trusted Cloud Computing:

This book documents the scientific results of the projects related to the Trusted Cloud Program covering fundamental aspects of trust security and quality of service for cloud based services and applications. These results aim to allow trustworthy IT applications in the cloud by providing a reliable and secure technical and legal framework. In this domain, business models, legislative circumstances, technical possibilities, and realizable security are closely inter-
