This book presents a detailed review of the state of the art in deep learning approaches for semantic object detection and segmentation in medical image computing and large scale radiology database mining A particular focus is placed on the application of convolutional neural networks with the theory supported by practical examples Features highlights how the use of deep neural networks can address new questions and protocols as well as improve upon existing cha From the Back Cover This timely text reference presents a detailed review of the state of the art in deep learning approaches for semantic object detection and segmentation in medical image computing and large scale radiology database mining A particular focus
