**From Springer : Requirements Engineering for Service and Cloud Computing** this authoritative textreference describes the state of the art in requirements engineering for software systems for distributed computing a particular on jan 1 2011 holger schrdl and others published requirements engineering for cloud computing Requirements Engineering for Service and Cloud Computing:

This authoritative text reference describes the state of the art in requirements engineering for software systems for distributed computing. A particular focus is placed on integrated solutions which take into account the requirements of scalability, flexibility, sustainability, and operability for distributed environments. Topics and features discussed include the latest developments, tools, technologies, and trends in software requirements engineering. Reviews the relevant From the Back Cover. This authoritative text reference describes the state of the art in requirements engineering for software systems for distributed computing. A particular focus is placed on integrated solutions which take into account the requirements of sc
