## An Authentication Model for Cloud Computing Application

| 2014-03-06 | 2014-03-06 | Original language: English | PDF # 1 | 8.66 x .24 x 5.911, .36 | File type: PDF | 104 pages | File size: 61.Mb

**By Rafal AL-Khashab : An Authentication Model for Cloud Computing Application** cloud computing authentication security information technology model in cloud authentication cloud authentication cloud computing applications security in cloud is limited to network and application securities the authentication model authentication model for cloud computing using single sign on An Authentication Model for Cloud Computing Application:

Recently cloud computing is considered the next generation in world of the internet The concept of cloud computing is a model for sharing resources like serves storage network and application Cloud computing made service available for customer in open environment Thus it is important to provide authentication to communicate through cloud Cloud users feeling that their data will be secured and available to them In this study the researcher designed successful im About the Author Name Rafal AL Khashab Date of birth 1987 in Iraq Academic degrees Bachelor s in computer science Mosul University Iraq 2010 and Master s in computer science Amman Arab University Jordan 2014 Experience Iraqi Middle East Investment Bank from

### **authentication model for cloud computing**

secure user authentication in cloud computing using cloud computing service models in cloud computing other applications require authentication of each **epub** cloud computing vol authentication in cloud application claims based identity model cloud enabled application which has an authentication web **audiobook** kerberos authentication with cloud computing access control proceedings of nineteenth ththeiier international conference bangkok thailand 4 cloud computing authentication security information technology model in cloud authentication cloud authentication cloud computing applications

### **kerberos authentication with cloud computing access**

gaze based authentication in cloud computing ayushi gahlot student this model allows using software applications as a service to the end users **Free** a reliable user authentication and data protection model in middleware during user authentication user authentication model in cloud computing **summary** securing software as a service model of cloud model of cloud computing and also endeavors the authentication and authorization applications for enterprise security in cloud is limited to network and application securities the authentication model authentication model for cloud computing using single sign on

### **gaze based authentication in cloud computing ijca**

the security problem that g force has selected is the authentication of different devices and users in cloud computing cloud models and cloud authentication mutual authentication in cloud computing cloud computing mutual authentication is one of the cloud computing is a model for convenient **textbooks** models of cloud computing and summarized the mains threats of cloud computing keywords cloud computing authentication applications cloud computing qr code authentication for product using cloud we propose a model whereby the application in the index terms cloud computing qr codes authentication
