Cloud computing has emerged as one of the enabling technologies that allows the world of Information Technology to use computer resources effectively and more efficiently. There is a growing trend of using cloud environments for storage and data processing needs. This book proposes a different approach for protecting data leakages in the cloud. In this book, various layers of security for data have been proposed which will provide the highest security to data in the cloud. These About the Author Dr A K Sen has experiences in different divisions of industry such as Project Training Design and Erection Commissioning. For the last 22 years he has been involved into Teaching and Research through many institutes and now holds the pos
