evaluation of cloud based application:

Nowadays web is gaining importance as a platform which provides different services and applications for facilitating the users. Further, what are the significant aspects in developing these applications from a student's perspective? How these services help to gain maximum resources with less effort as Cloud computing offering to the users e.g. software as a service. Cloud computing means computing in remote locations as Google Apps presents Cloud computing as an i. About the Author: Faisal is serving as Lecturer Head in UIC in the University of Faisalabad. He earned his MS CS and business studies from EU and Continuing for MS EE from School of Eng at BTH Sweden. After the completion of BS IT he worked in multinational.
