proceedings of the first international conference on icon 2002 of multi wavelength backward pumped broadband fiber optical communications and networks span restorable mesh networks with presented at the first international conference on optical communications and networks icon 02 singapore nov 11 14 2002 Optical Communications and Networks : Proceedings of the First International Conference on Icon 2002:

Optical communications networks are becoming increasingly important as there is demand for high capacity links Dense wavelength division multiplexing DWDM is widely deployed at the core networks to accommodate high capacity transport systems Optical components such as optical amplifiers tunable filters transceivers termination devices and add drop multiplexers are becoming more reliable and affordable Access and metropolitan area networks are increasingly built w
